

Epoxy Flooring Systems – Read More

Metallic Epoxy Floors

Metallic epoxy flooring is designed to create a high-end, eye-catching finish with depth and movement. This system uses special metallic pigments mixed into the epoxy, producing a flowing, marbled effect. Because of the application process, no two metallic floors are ever the same.

Metallic epoxy floors are seamless, durable, and easy to maintain, making them ideal for spaces where visual impact is just as important as performance.

Best Fit For:

- Showrooms and retail spaces
- Modern residential interiors
- Statement garages
- Offices and lobbies
- Entertainment or display areas

Epoxy Resin Floors (Solid Color Systems)

Epoxy resin flooring provides a smooth, seamless surface built for strength and durability. Installed as a solid color system, it is engineered to withstand heavy traffic, moisture, and chemical exposure.

This system is valued for its clean, professional appearance and long-lasting performance in demanding environments.

Best Fit For:

- Garages
- Shops and workshops
- Hangars
- Warehouses
- Commercial and industrial spaces

Quartz Epoxy Floors

Quartz epoxy flooring combines colored quartz granules with a high-performance epoxy binder to create a textured, slip-resistant surface. This system offers enhanced traction while maintaining a

polished, professional look.

Quartz systems are known for their durability, moisture resistance, and safety in high-traffic areas.

Best Fit For:

- Commercial buildings
- Restrooms and locker rooms
- Restaurants and hospitality spaces
- Entryways and corridors
- Areas requiring added slip resistance

Flake Epoxy Floors

Flake epoxy flooring is one of the most popular and versatile epoxy systems available. Decorative vinyl flakes are broadcast into the epoxy coating, creating a multi-tone, textured finish that enhances both appearance and functionality.

Flake floors help hide dirt, dust, and surface imperfections while improving slip resistance and durability.

Best Fit For:

- Residential garages
- Homes and basements
- Shops and workspaces
- Commercial spaces
- Multi-use areas
